CHARGE AND DATA DOCK

Charge, connect and transfer data from up to 6 Dustlights via USB

ABOUT

The Dustlight 6-Way Docking Station combines charging and data management in a single compact unit. Connected via USB to a computer running the Dustlight Web App.

It lets you export data from up to six devices at once and adjust their settings centrally* — all while charging. Designed for organisations running multiple devices, it makes fleet management faster and more efficient.

*Simultaneous data export and organization wide settings are part of a future software update. The dock hardware supports these functions already, but they are not available directly from the start.

KEY FACTS

Dimensions **220x192x60 mm**

PACKAGE CONTENT

- Dustlight charge and data dock
- 12V Power Adapter (country specific)
- 1 Meter USB 3.0 Cable (USB Micro-B to USB A)

KEY FEATURES

USB Data Export

Export data of multiple Dustlights to the Webapp. USB allows all functions of the Bluetooth connection.

Charging

Charge 6 Dustlights at once without the hassle of separate cables or power adaptors.

Fleet Management

Workers pick the Dustlight at the start of the shift and return them. After placing them in the dock, the days data gets uploaded.*

Daisy Chain

The Dock features a USB-Input, to connect multiple docks without the need for another USB-Hub.
